M. G. E. Kelly : Biopolitical Imperialism before purchasing it in order to gage whether or not it would be worth my time, and all praised Biopolitical Imperialism:

Biopolitical Imperialism is a book about international politics today. The core, eponymous thesis is that our world is marked by a pattern of biopolitical parasitism, that is, the enhancement of the life of wealthy populations of First World countries on the basis of an active denigration of the lives of the poor mass of humanity. The book details how

this dynamic plays out both inside wealthy countries and internationally.
