Mark Beckner : BizTalk 2010 EDI for Health Care: HIPAA Compliant 837 Solutions before purchasing it in order to gage whether or not it would be worth my time, and all praised BizTalk 2010 EDI for Health Care: HIPAA Compliant 837 Solutions:

1 of 1 people found the following review helpful. Priceless resource for CTO new to BizTalkBy ohwellI purchased this book as a companion to "BizTalk 2010 Recipes", also by Mark Beckner, to help in my transition from an IT Manager/Director to a Health Care EDI Consultant. Explaining (or even understanding) how BizTalk works can be overwhelming. "BizTalk 2010 EDI for Health Care" walks you though, step-by-step, in creating a basic solution that includes all the critical components of a BizTalk application, and explains the key concepts and reasoning behind

following certain methodology. I can't recommend this book enough for people who are looking for a jump-start in understanding BizTalk 2010 in Health Care, or who need to explain BizTalk 2010 to business units. 2 of 3 people found the following review helpful. uggggh
By Kiran Gundapaneni
This book is a pure waste - costs \$69 with taxes. It is 95 pages and content is 75 pages only. The book is the size of a mini iPad. Not sure who wrote the other reviews. Content is very generic - something that you can search on google.

Excellent reading
By T. Arisawa
After recently graduating college in 2011, I landed a job for a health care company, and was immediately thrown into a BizTalk development role that implemented many scenarios presented in this book. I have spent countless hours figuring out many of the topics in this book, such as the mapping of 837P 5010 to 837P 4010. Also, I have had to work with existing maps that look like the unsupportable example on page 49. I wish this book would have come out 2 years ago. It would have saved me literally hundreds of hours. This book should be required reading for anybody implementing BizTalk EDI health care solutions, and is worth its weight in gold.

Building a successful health care claims processing EDI implementation in BizTalk Server can be complex. Decisions must be made around how to extract and publish data, how to map to the 837 EDI standard, and how to appropriately batch and deliver data. If architected properly, your BizTalk solution can be highly efficient, simple, and something that can be managed and extended for years to come. The topics in this book include building complete inbound and outbound solutions for 837 Institutional and Professional EDI document types. In addition, topics around 997/999 acknowledgements and related document types are included. Covering mapping, trading partner configuration, AS2, SFTP, data extraction, data routing, and batching, you will find this to be a goldmine of information to aid you in a successful implementation.
What you'll learn
1. Successfully create HIPAA compliant 837 Professional implementations
2. Build fully operational inbound and outbound processes using AS2, SFTP, and FTP
3. Integrate with SQL Server, .NET Libraries, and other platforms and technologies
4. Develop maps, schemas, orchestrations and configure encrypted file delivery
5. Configure batching of documents for various scenarios
Who this book is for
BizTalk 2010 Developers, technical architects, and executives of Health Care Companies looking to implement BizTalk or EDI, BizTalk 2010

About the Author
Mark Beckner is a technical consultant specializing in business development and enterprise application integration. He runs his own consulting firm, Inotek Consulting Group, LLC, delivering innovative solutions to large corporations and small businesses. His projects have included engagements with numerous clients throughout the U.S., and range in nature from mobile application development to complete integration solutions. He has previously authored BizTalk 2010 Recipes, Pro EDI in BizTalk Server 2006 R2, and Pro RFID in BizTalk Server 2009, and has spoken at a number of venues including Microsoft TechEd. In addition to BizTalk, he works with SharePoint, MSCRM, and custom .NET development. Beckner, his wife Sara, and his boys Ciro and Iyer live in New Mexico. His website is <http://www.inotekgroup.com> and he can be contacted directly at mbeckner@inotekgroup.com.
