Larry and Patrick deliver a fantastic, enjoyable read that provides many helpful ways to manage both your personal and professional brand. By weaving in stories from the

experiences in his own home Larry also enlightens the reader on ways to help your children manage their personal brands. I plan to make this required reading for my children so they understand social media, their social circles, and how to manage their personal brands. Many pages of Brand Aid provide practical guidance and I have earmarked them for reference as I manage my personal, business and the children's brands. I highly recommend Brand Aid. 0 of 0 people found the following review helpful. Now in paperback: Hands-on strategies for creating and protecting your personal brand (yes, you have one) Think branding is just for large corporations, marketing directors, and cows? Think again. Each one of us has a brand; a personal brand, how others see us; which is shaped by what we do, say, write, and otherwise present ourselves to others. We can't fully control how others see us (smart, capable, compassionate, creative, fair). But many of us don't even try. That is, we don't take a moment to think about how we WANT to be perceived, and then take a few simple steps to bolster that impression with purposeful action. BRAND AID isn't a book about manipulating others, putting on airs, or saying things you don't really mean. It IS about using our words and actions mindfully, whether they take place in a conference room, PTA meeting, dinner party, Facebook comment thread, or anywhere else. Using clear examples from businesses, families, and more, this straightforward guide presents essential advice for anyone who wants to succeed in today's competitive and interconnected world.
