Patrick Bond, Ana Garcia : BRICS: An Anti-Capitalist Critique before purchasing it in order to gauge whether or not it would be worth my time, and all praised BRICS: An Anti-Capitalist Critique:

2 of 2 people found the following review helpful. Tension between capitalist growth and justice-based citizenshipBy Romi MahajanAn excellent set of essays on the "emerging economies" called BRICS, an expansion of the earlier BRIC formation with the "S" being South Africa. These essays discuss the tensions between the aspirations of the powerful in these large economies and their common citizens, positing that "growth" is not an unalloyed good. Trenchant critiques of capitalism undergird these essays as does a critique of neo-liberalism in all its offshoots. That

the world is multipolar has become a truism but the degree to which a certain economic model has become dominant (neo-liberalism capitalism) isn't often explored- BRICS provides a readable assessment of this with these large and developing economies as test cases. The essays are uniformly interesting and suggestive- not only of what's gone wrong but also of what is possible.

One of the defining features of the global economy is the rise of the BRICS - a bloc of emerging economies, comprised of Brazil, Russia, India, China and South Africa. These nations seem to be growing at a much faster rate than the developed nations of the Eurozone and North America. Will the BRICS help drag the developed world out of the economic mire? Will they force social change and innovation into the tired 'old world order'? And politically, do they herald a new dawn for democracy or do they represent a continued political repression? BRICS: An Anti-Capitalist Critique is an edited collection which aims to answer these questions by offering critical analysis of the rise of the BRICS economies within the framework of a predatory, exclusionary and unequal global capitalism. A range of approaches to the emergence of new economies of the global South are included, which are variously cooperative and antagonistic to the traditional powers. Bringing to light a new perspective on these nations, this is an invaluable book for those who want to understand the current geopolitical and economic landscape from an anti-capitalist viewpoint.

'A uniquely valuable resource written by a stellar group of authors. They pierce through every aspect of the discourse around the BRICS, showing the reality beneath the politically engineered triumphalism.' -- Alfredo Saad-Filho, Professor of Political Economy, School of Oriental and African Studies, University of London "This book is the most significant work yet published to examine these issues through a critical lens. It features essays from leading leftist scholars across the world such as Patrick Bond, Immanuel Wallerstein, Leo Panitch, William Robinson, Elmar Altvater, and Vijay Prashad, among many others ... The authors document the currently existing positions on the BRICS: from those who celebrate it, are cautious of it, to those who criticize it. It provides a useful and comprehensive overview of the current state of debate on the topic and provides a clear way to introduce the volume.' --James Parisot, Marx Philosophy of Books

About the Author Patrick Bond is senior professor at the University of KwaZulu-Natal in South Africa, where he has directed the Centre for Civil Society since 2004. He is the author of many acclaimed books on South Africa including Talk Left, Walk Right and Elite Transition. Ana Garcia is professor of international relations at the Federal Rural University of Rio de Janeiro in Brazil.
