**Brian Tew : International Monetary Co-operation 1945-52** before purchasing it in order to gage whether or not it would be worth my time, and all praised International Monetary Co-operation 1945-52:

Attempts to establish an international economic and financial order where a key feature of the settlement which followed the Second World War, as policy makers sought to establish a framework which would prevent an economic crisis on the scale of the great depression. This volume explores this period, focusing on monetary issues. Part 1

provides a general analysis of the scope for international monetary co-operation dealing in particular with: \* The Provision of additional means of international settlement \* The arrangement of settlements on a multilateral basis \* The orderly fixation of exchange rates \* The correction of international disequilibria \* The provision of safeguards against the international transmission of business depressions. Part 2 deals with the actual machinery of international co-operation since the war and in particular with \* The International Monetary Fund \* The European Payments Union \* The role of sterling Part 3 surveys the actual course of events since 1945, illustrating the problems that have called for treatment by international co-operation, the extent to which such treatment has been attempted, and with what success.
