Moorad Choudhry : Structured Credit Products: Credit Derivatives and Synthetic Securitisation (Wiley Finance) before purchasing it in order to gage whether or not it would be worth my time, and all praised Structured Credit Products: Credit Derivatives and Synthetic Securitisation (Wiley Finance):

1 of 1 people found the following review helpful. great bookBy Sameer NYReading the book is like reading 50 primers at once consolidated to make a great explanation of the subject.Recommend1 of 1 people found the following review helpful. Exceptionally brilliant book for practitioners' perspectivesBy Shyam MohanHats off to Moorad for writing this exceptionally brilliant book which is very handy and really helpful for practitioners. The basket CDO and

Copula (Gaussian and Student's t...etc.) is very well defined with all possible illustrations which is use in industry. And moreover, the accompanied CD which has lot of illustrations coded in VBA which makes this topic self-read and learn. I found this book a single source of reference on structure credit products that covers pricing, its characteristics, operational aspects, embedded risk, VBA codeetc.in one place.Thanks.3 of 4 people found the following review helpful. A well written book with an excellent coverage of credit products from theoretical and practical perspectivesBy JoriThis book helped me a lot with my studies in finance. The problem with most books is that they don't cover the topics from a practitioner's perspective. As I am currently working at my first job in the financial market (risk management), much of the examples shown in this book has helped me to grasp the mechanics hands on, beyond the theoretical. The book serves (of course) also as an excellent reference to credit products. I currently own 3 books from Mr. Choudhry and every one of them is full of practical examples with Bloomberg terminal screenshots to better understand the topic discussed from a practitioners perspective and without forgetting the theoretical explanations.To summarize, I would recommend this book for anyone still studying or working in the banking market.

Updated coverage of structured credit products with in-depth coverage of the latest developments Structured credit products are one of today's fastest growing investment and risk management mechanisms, and a focus of innovation and creativity in the capital markets. The building blocks of these products are credit derivatives, which are among the most widely used products in finance. This book offers a succinct and focused description of the main credit derivative instruments, as well as the more complex products such as synthetic collateralized debt obligations. This new edition features updated case studies from Europe and Asia, the latest developments in synthetic structures, the impact of the subprime meltdown, along with models and teaching aids. Moorad Choudhry returns with this excellent update of the credit derivatives market. The second edition of his classic work is, like the subject matter itself, at the forefront of the financial industry. It deserves a wide readership. —Dr Didier Joannas Regional Director, Thomson Reuters, Hong Kong This is the perfect companion for both experienced and entry level professionals working in the structured credit fraternity. It is an erudite, insightful and enjoyable read that successfully demystifies one of the most topical subject areas in banking today, while also providing important practical examples that link the theory to the job itself. —Dr James Berriman Global Pricing Unit, Royal Bank of Scotland Moorad Choudhry has earned a deserved reputation from both academics and practitioners as one of the leading practical yet rigorous authors of finance books. In this Second Edition, his practical knowledge of credit derivatives keeps the audience engaged with straightforward explanations of complicated structures, and an accessible level of mathematical sophistication necessary to understand structured credit products. The author offers complete, rigorous analysis while avoiding overuse of mathematical formulas and carefully balanced practical and theoretical aspects of the subject. I strongly recommend this book for those wishing to gain an intuitive understanding of structured credit products, from practitioners to students of finance! —Mohamoud Barre Dualeh Senior Product Developer, Abu Dhabi Commercial Bank, UAE This is THE book for credit derivative trading. From first steps to advanced trading strategies, this is invaluable. Well written and insightful, perfect for ad hoc reference or reading cover to cover. —Andrew Benson ETF Market Making, KBC Peel Hunt, London Professor Choudhry has inspired me to really get into credit derivatives. It's great to be lectured by someone with such energy and practical hands-on experience, as well as the ability to get stuck into the details. —George Whicheloe Equity-Linked Technology, Merrill Lynch, London Moorad Choudhry is Head of Treasury at Europe Arab Bank plc in London. He is a Visiting Professor at the Department of Economics at London Metropolitan University.

From the Inside FlapStructured credit products including synthetic collateralised debt obligations were the subject of considerable media scrutiny in the wake of the US mortgage market crash, as banks around the world suffered large losses on holdings in such products. At the same time, investors that had shorted these exposures using credit derivatives profited from the downturn in the market.As risk management tools, credit derivatives remain as important as ever Professor Moorad Choudhry's best-selling book on credit derivatives brings readers up to date with developments in the market following the 2007–2008 financial crisis, and covers changes in the markets since then. This Second Edition provides an update on credit derivative products and their uses. New material is presented on: latest structured credit products and synthetic funding structures;
