I have to be able to participate in a group discussion in another two weeks. The reading was too slow and I felt I might miss the high points. I had several AHA moments reading this summary and am very grateful that a colleague recommended this solution. I also found the content to be extremely pertinent to some leadership challenges

being discussed with some clients. Now I have a very affordable 30-minute leadership tool I can recommend that will nail down options...and frankly, bust open wonderful new perspectives and possibilities. I am really excited about the quality of material that was offered in this summary. 0 of 0 people found the following review helpful. Useless! By Customer Unless you are going to sit in bright light with a huge magnifying glass then you should not order this. I wear glasses, they are brand new and while I can read type this small the production of this is horrid and ridiculous for the price. Useless! 0 of 0 people found the following review helpful.
