be with the history mass messaging and propaganda. He takes this journey to our inevitable present day of Facebook, Instagram and the advertising technology that seemingly follows us everywhere. This book would be well read by anyone in advertising, pay TV or the media content business. 0 of 0 people found the following review helpful. Increased my understanding of media By A. Kuder A very useful review of the history of advertising and marketing as instruments to manipulate us. It does not provide profound solutions to the problems. To the extent it informs us of what we are being subject to, it at least allows us to control our information environment a little better. I would say it is an important read for anyone who thinks they understand media. 0 of 0 people found the following review helpful. This was a very well written historical account of our ... By mark grabe This was a very well written historical account of our willingness to trade our attention and access to information about us for the willingness to view ads accompanying some unit of information. I thought the willingness of content creators to share their insights and creativity online might have received a little more attention. No solutions were really proposed but this may have been a bit much to expect.

One of the Best Books of the Year The San Francisco Chronicle * The Philadelphia Inquirer * Vox * The Globe and Mail (Toronto) From Tim Wu, author of the award-winning *The Master Switch* (New York and Fortune Book of the Year) and who coined the term "net neutrality"; a revelatory, ambitious and urgent account of how the capture and re-sale of human attention became the defining industry of our time. Ours is often called an information economy, but at a moment when access to information is virtually unlimited, our attention has become the ultimate commodity. In nearly every moment of our waking lives, we face a barrage of efforts to harvest our attention. This condition is not simply the byproduct of recent technological innovations but the result of more than a century's growth and expansion in the industries that feed on human attention. Wu's narrative begins in the nineteenth century, when Benjamin Day discovered he could get rich selling newspapers for a penny. Since then, every new medium—from radio to television to Internet companies such as Google and Facebook—has attained commercial viability and immense riches by turning itself into an advertising platform. Since the early days, the basic business model of "attention merchants" has never changed: free diversion in exchange for a moment of your time, sold in turn to the highest-bidding advertiser. Full of lively, unexpected storytelling and piercing insight, *The Attention Merchants* lays bare the true nature of a ubiquitous reality we can no longer afford to accept at face value

Vigorous, entertaining. . . . Wu describes how the rise of electronic media established human attention as perhaps the world's most valuable commodity. *The Boston Globe* *The Attention Merchants* is a book of our time, touching on an emerging strain of anxiety about the information age. . . . A bracing intellectual tour de force. *The San Francisco Chronicle* Comprehensive and conscientious, readers are bound to stumble on ideas and episodes of media history that they knew little about. [Wu] writes with elegance and clarity, giving readers the pleasing sensation of walking into a stupendously well-organized closet. *The New York Times* A startling and sweeping examination of the increasingly ubiquitous commercial effort to capture and commodify our attention. . . . We've become the consumers, the producers, and the content. We are selling ourselves to ourselves. *The New Republic* The book is studded with sharp illustrations of those who have tried to stop the encroachment of advertising on our lives, and usually failed. . . . Wu dramatizes this push and pull to great effect. *The New York Times Book* An engaging history of the attention economy. . . . [Wu] wants to show us how our current conditions arose. *The Washington Post* Dazzling. . . . [Wu] could hardly have chosen a better time to publish a history of attention-grabbing. . . . He traces a sustained march of marketers further into our lives. *The Financial Times* [An] erudite, energizing, outraging, funny and thorough history of one of humanity's core undertakings—getting other people to care about stuff that matters to you. *Boing Boing* Engaging and informative. . . . [Wu's] account . . . is a must-read. *The Washington Times* About the Author Tim Wu is a policy advocate and professor at Columbia Law School. In 2006, *Scientific American* named him one of fifty leaders in science and technology; in 2013, *National Law Journal* included him among *American's* 100 Most Influential Lawyers; and in 2014 and 2015, he was named to the *Politico* 50. He won the Lowell Thomas Gold medal for travel journalism and is a contributing opinion writer for *The New York Times*. <http://www.timwu.org>
