our economy (supported by 70 of the population) and statism/big government policies (supported by 30%). Mr. Brooks discusses with logic supported by abundant data that capitalism contributes to solid economic growth, wealth creation, and true human happiness. European socialism, dependency, and government control and policies has failed throughout western europe, and when tried here is destroying the American dream, creating more dependency and poverty, reducing happiness, lowering employment, and a host of economic ills. The new playbookBy Geoff PuterbaughI agree with Dick Cheney: this is the playbook for the conservative renaissance --- or at least one of them.Brooks' main point is that we should stop harping on the economics and the money, and make our stand on principles: Life, Liberty, and the Pursuit of Happiness. Every increase in the size of government, every tax hike, and every new regulation impinges on the freedom of free American citizens. We have even reached the point where the nanny-mayor of New York is forbidding his fellow citizens to eat stuff that he doesn't like!The only quibble I have, at this point, is that during the elections of 2010 (coming right up) it would be idiotic to completely ignore the economic mess created by Team Obama. That's the number one issue for most voters, and we need to be very clear that conservative, Constitution-based government will not only increase all of our hopes for life, liberty, and the pursuit of happiness --- it will also end the Endless Recession caused by the idiots in the White House. (Imagine being "anti-business" when business signs your bleeping paycheck! Yes, they are just as dumb as that, and even dumber.)So, read this book, and avoid being sent to one of Sibelius's "re-education camps." You might even avoid the "death panels," too! :-)

Positions the coming election exactlyBy ProfessorPresident Obama wants to make the coming 2010 elections - and 2012 - elections, an election of policies of the past (Bush) against the policies of the future (Obama). The Battle shows why this is the wrong argument to have during these elections.The right argument is the battle of socialism (Obama) vs free market capitlalism (anyone opposed to Obama). This is how the election must be defined.The Battle logically and clearly lays out how Obama is on a mission to make the USA a socialist country like Greece and France, 2 failed economies. While Obama insists he is not a socialist, he persues socialist policies, appoints socialists to key positions in government, and sets up program after program to redistribute wealth from producers to non-producers and The Battle sheds light on all these actions.The Battle clearly lays out the arguments why Obama's socialist policies MUST be defeted and how to defeat them. This is a must read for anyone concerned about the future of our great country.

America faces a new culture war. It is not a war about guns, abortions, or gaysmdash;rather it is a war against the creeping changes to our entrepreneurial culture, the true bedrock of who we are as a people. The new culture war is a battle between free enterprise and social democracy.Many Americans have forgotten the evils of socialism and the predations of the American Great Society's welfare state programs. But, as American Enterprise Institute's president Arthur C. Brooks reveals in The Battle, the forces for social democracy have returned with a vengeance, expanding the power of the state to a breathtaking degree.The Battle offers a plan of action for the defense of free enterprise; it is at once a call to arms and a crucial redefinition of the political and moral gulf that divides Right and Left in America today. The battle is on, and nothing less than the soul of America is at stake.
