**John Sender, Sheila Smith : The Development of Capitalism in Africa (Routledge Library Editions: Development)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Development of Capitalism in Africa (Routledge Library Editions: Development):

First published in 1986, this work challenges underdevelopment analyses of Africa's past experiences and future prospects, and builds upon a very wide range of recent historical research to argue that the impact of Capitalism has resulted in economic progress and significant improvements in living standards. In marked contrast to the dependency approach, they propose that the important political and economic differences between the experiences of developing

countries should be stressed and analysed. The argument is supported by a detailed look at the emergence since 1900 of capitalist social relations of production in nine different countries.

‘Witheringly critical of dogmatic World Bank and IMF beliefs that state intervention as such is likely to reduce economic welfare ... The strength of the book is its thoroughly empirical foundation’; *Journal of Southern African Studies* ‘Sender and Smith have provided much to argue about and their book can be recommended as a lively treatment of its subject and not least for its caustic rebukes to the faint-hearted. Anyone wearied by the writings of neo-Marxists, dependency theorists and populists on Africa can find relief here.’; *Times Higher Education Supplement*
